Loading Supervision

Overview

We physically supervise the container loading process, verify quantities against the packing list, and apply our own tamper-proof seal to ensure your goods leave the factory safe and complete.

What's Included

- Container condition check
- Quantity verification
- Packaging integrity
- Sealing & Reporting

1 Day (Report in 24h)

Success Story

A UK client feared humidity damage for a sensitive furniture shipment due to rainy weather.

Result

We rejected a container with holes, requested a dry one, and supervised proper desiccant usage, preventing €15k in damages.

Why It Matters

Loading the wrong way or using a bad container ruins perfect products. Physical oversight prevents transit disasters.

How We Deliver

On-site supervision, real-time photo evidence, and a sealed verification report before the truck leaves.

Details

Why Loading Supervision Matters?

Production might be perfect, but loading is the final critical step. A wet container, poor stacking, or "short-shipping" (missing boxes) can ruin your investment instantly. Without supervision, you have no proof of what actually went inside that truck. At ACTR, we act as your unbiased witness to ensure total compliance before departure.

Our Approach

We don't just watch; we enforce your standards using a strict 4-point framework:

- **Container Hygiene** - Is the container dry, odorless, and hole-free? We reject unfit containers immediately before loading begins.
- **Quantity Verification** - We count every carton against the Packing List. No "ghost boxes" or short-shipments allowed.
- **Stacking Logic** - We supervise forklifts to ensure heavy items are at the bottom, maximizing space and preventing crushing.
- **Sealing & Security** - We witness the door closing and apply the unique ACTR tamper-proof seal to prevent theft during transit.

What Sets ACTR Apart?

- **Total Independence** - We represent YOU, not the forwarder or factory. We have the authority to stop loading if risks appear.
- **Engineering Eye** - We understand weight distribution and packaging dynamics to prevent physical damage during transit.
- **Real-Time Evidence** - You don't just get a report; you get photos/videos of the empty container, loading progress, and the seal.
- **Tamper-Proof Protocols** - We use our own numbered seals, providing you with legal proof that the container was secured.

Outcomes You can Expect

By the end of supervision, you'll have:

- Verified quantity matching your invoice perfectly.
- Minimized risk of humidity or physical damage.
- Legal evidence (photos/video) for insurance claims.
- Peace of mind that your goods are safe.

Why Partner With ACTR?

Shipping is the "blind spot" of sourcing. ACTR removes this blindness. We serve as your **last line of defense** in Türkiye, ensuring that what you paid for is exactly what is shipped. **Secure your investment until the very last moment.**
